

ENVIRONMENTAL POLICY STATEMENT OF AGCHEM AFRICA (PTY) LTD

We as management of Agchem are committed to a policy of environmental protection and prevention of pollution. We will ensure that this policy is understood, accepted, implemented and maintained throughout the company. As a leading industrial enterprise, at the forefront of technological innovation in manufacturing of Agricultural remedies, Agchem recognises its responsibilities to the environment and is committed to the best environmental practice. Agchem will comply with the relevant legislation, regulations, Agchem Environmental Strategy and strive towards achieving ISO 14001 - certification.

Agchem will commit itself to continual improvement of environmental performance by maintaining a monitoring system and evaluation of targets and objectives.

In fulfilment of this policy we shall ensure that all environmental impacts that Agchem can have, are known and are continuously audited.

Our environmental policy is thus directed towards achieving the following objectives:

- To constantly increase environmental consciousness and application in all personnel.
- To achieve an environmentally friendly work place in order to promote Quality of Life for all employees.
- To constantly improve communication and co-operation between all departments, functions, suppliers, sub-contractors, the customer and the community.
- To constantly improve managerial and technical skills and to instil the need for self-discipline and attention to detail in all personnel in conducting the activities of the company.
- To constantly strive to reduce any negative environmental impact of our products and processes.
- To continue to invest in improved energy efficiency and energy conservation.
- To conserve natural resources through efficient use and careful planning.
- To control the creation of waste and, wherever practicable, recycle materials and waste. Hazardous Waste and effluents will be disposed of in a safe and responsible manner.
- To eliminate or reduce as far as possible the release of emissions or any pollutant that may cause environmental damage.
- To minimise health and safety risks to employees and communities in which we operate.
- To assess new processes for possible negative environmental impact before introduction.
- To undertake regular environmental monitoring and auditing of our activities.

I, the Chief Executive Officer on behalf of Management, therefore commit ourselves to the achievement of the Environmental Management System based on the National Environmental Management Act of South Africa and require that all employees of Agchem, our suppliers and contractors familiarise themselves and work according to the system, procedures, authorities and responsibilities contained in the documented system.

C. Meyer

Managing Director
