COUNTRY OF ORIGIN: REPUBLIC OF SOUTH AFRICA
VERSION ROLFES AGRI: 01/2019
For optimum results **ACTICELL CITRUS** should be used in a programme and in combination with other balanced fertilisers and foliar feeds.

Consult with your chemical distributor should crop specific programmes or any other information be required about the use of **ACTICELL CITRUS**.

It is advisable to do a miscibility test prior to mixing with other chemicals.

Ensure thorough agitation of the product during filling and spraying. Always use spray tank strainers when pouring product into spray tank. The spray tank must be flushed out with clean water at the end of the day.

**ACTICELL CITRUS** should preferably be applied in the early morning or late afternoon. Do not apply to wet fruit. Do not apply to plants that are undergoing a period of moisture or heat stress.

Shake the container thoroughly before use.

Use lower rates as maintenance and higher rates to correct deficiencies.

Store in the original, well sealed container away from sunlight. Keep away from children, uninformed people, animals and foodstuffs. Wash hands after use.

**DIRECTIONS FOR USE: USE ONLY AS DIRECTED**
