A water soluble fertiliser for use as a foliar feed to maintain or increase zinc and nickel levels in plants.

To be used exclusively as a foliar spray on pecan or macadamia nuts in cases where Nickel (Ni) applications are indicated.

Nitrogen (N)  31 g/kg (43 g/ℓ)
Sulphur (S)  13 g/kg (18 g/ℓ)
Zinc (Zn)  58 g/kg (81 g/ℓ)
Nickel (Ni)  24 g/kg (33 g/ℓ)

SG (@ 20 °C) = 1.39 ± 0.02

Fertiliser Group 2

For optimum results **ACTICELL NUTTY PECAN** should be used in a programme and in combination with other balanced fertilizers and foliar feeds.

- It is advisable to do a miscibility test prior to mixing with other chemicals.
- Consult with your chemical distributor should crop specific programmes or any other information be required about the use of **ACTICELL NUTTY PECAN**.
- **ACTICELL NUTTY PECAN** should preferably be applied in the early morning or late afternoon. Do not apply to wet fruit. Do not apply to plants that are undergoing a period of moisture or heat stress.
- **Do NOT apply ACTICELL NUTTY PECAN:**
  - In combination with copper containing fungicides, phosphates or phosphonates.
  - Within 30 days after application of any copper fungicides.
  - In combination with highly alkaline material such as lime sulphur or alkaline boron products.
- Ensure thorough agitation of the product during filling and spraying. Always use spray tank strainers when pouring product into spray tank. The spray tank must be flushed out with clean water at the end of the day.
- Use lower rates as maintenance and higher rates to correct deficiencies.
- Store in the original, well-sealed container away from sunlight. Keep away from children, uninformed people, animals and foodstuffs. Wash hands after use.

**DIRECTIONS FOR USE: USE ONLY AS DIRECTED**

<tbody>
<tr>
<td>Pecan nuts</td>
<td>2 - 3 ℓ</td>
<td>100 - 150 mℓ</td>
<td>For the correction and prevention of “mouse ear” on pecans and to reduce nut drop and improve disease resistance. Three applications per season are recommended. The first two sprays for the correction and prevention of “mouse ear”. First application at parachute stage and repeat 3 weeks later. The third application in March / April to prevent deficiency for the next growing season. Apply in 1000 – 2000 ℓ of water per ha.</td>
</tr>
<tr>
<td>Macadamias</td>
<td>2 – 3 ℓ</td>
<td>100 – 150 mℓ</td>
<td>Apply 2 – 3 applications. Apply the first application at flower bud swell, the second application at fruit set, and the third application prior October / November fruit drop. Apply in a minimum of 2 000 ℓ water per hectare.</td>
