For optimum results ACTICELL PROTOSURE should be used in a programme together with other products in the ACTICELL range.

Consult with your chemical distributor, consultant or the registration holder should crop specific programmes or any other information be required about the use of ACTICELL PROTOSURE.

Ensure thorough agitation of the product during filling and spraying. Always use spray tank strainers when pouring product into spray tank. The spray tank must be flushed out with clean water at the end of the day.

It is advisable to do a miscibility test prior to mixing with other chemicals.

ACTICELL PROTOSURE should preferably be applied in the early morning or late afternoon. Do not apply to wet fruit. Do not apply to plants that are undergoing a period of moisture or heat stress.

Ensure good agitation throughout application.

Shake the container thoroughly before use.

Use lower rates for maintenance and higher rates to correct deficiencies.

Store in the original, well-sealed container away from sunlight. Keep away from children, uninformed people, animals and foodstuffs. Wash hands after use.

DIRECTIONS FOR USE: USE ONLY AS DIRECTED
