

ADJUVANT

Aqua-Stic Nutech

Reg. No. L10440 Act No. 36 of 1947

ADJUVANT • STICKER

A non-ionic sticker designed to cause prolonged adherence of Insecticides, Fungicides, Herbicides and Foliar fertilisers.

Active Ingredient:

Poly-1-p-menthene

850 g/l

Product approved for the use in organic farming according to EEC889 and JAS by CERES GmbH. JAS: as pesticide inert.

IN CASE OF POISONING PLEASE PHONE 082 466 8946

UN NO.: NOT REGULATED

SEE CONTAINER FOR BATCH DETAILS

COUNTRY OF ORIGIN: REPUBLIC OF SOUTH AFRICA

VERSION ROLFES AGRI: 06/2019

CAUTION

LIFT HERE

SHAKE WELL Shake well before use • Store at room temperature
Keep out of direct sunlight • Keep container closed when not in use

WARNINGS

- Refer to the label of the agricultural remedy with which **AQUA-STIC NUTECH** is to be used, but do not use within the last 7 – 14 days before harvest.
- Observe all warnings that apply to the product(s) with which **AQUA-STIC NUTECH** is to be used.
- Store away from food and feed.
- Keep out of reach of children, animals and uninformed persons.

Although this remedy has been extensively tested under a large variety of conditions the registration holder does not warrant that it will be efficacious under all conditions because the action and effect thereof may be affected by factors such as abnormal climatic and storage conditions, quality of dilution water, compatibility with other substances not indicated on the label as well as by the method, time and accuracy of application. The registration holder furthermore does not accept responsibility for damage to crops, vegetation, the environment or harm to man or animals or for lack of performance of the remedy concerned due to failure of the user to follow the label instructions or to the occurrence of conditions, which could not have been foreseen in terms of registration. Consult the supplier in the event of any uncertainty.

PRECAUTIONS

- Avoid eye and skin contact.
- Avoid prolonged contact with the concentrated product.
- Avoid spray drift onto non-target areas.
- Wash with soap and water after accidental skin contact, and rinse the skin well.
- In case of contact with eyes, flush immediately with clean water for at least 15 minutes. If contact lenses are present in the eyes, only medical professionals should attempt to remove them.
- Wash hands and face thoroughly with soap and water after use and before smoking, eating or drinking.
- Rinse the container three times. For each rinse add clean water, to the volume of a quarter of the container, close the cap and agitate or shake well. Decant the rinse water into the spray tank.
- Puncture the container. Keep caps separate and hand over to one of the CropLife South Africa approved collectors or recyclers.
- Prevent contamination of food, feeds, drinking water and eating utensils.
- Thoroughly clean and rinse the spray tank, lines and nozzles after use. Dispose of the wash water where it will not contaminate crops, grazing, rivers or dams.
- This product is extremely sticky in concentrated form and may be difficult to remove should it come into contact with skin and/or other surfaces. Take the necessary precautions during handling and application.

GENERAL

- AQUA-STIC NUTECH** is a sticker based on an organic resin that is designed to cause prolonged adherence of Insecticides, Fungicides, Herbicides and Foliar fertilisers to plant surfaces.
- AQUA-STIC NUTECH** contains film-forming polymers which ensure the effective retention of the product (and remedy with which it is applied) on the plant surfaces, and the elasticity of the product, after application.
- AQUA-STIC NUTECH** is biodegradable and will not accumulate on the plant surface with time. Both the dosage used and the current environmental conditions will determine for how long the product will remain on the surfaces of the plants.
- AQUA-STIC NUTECH** may reduce the loss of active ingredient(s) of agricultural remedies to the environment as a result of being washed off by rainfall and/or irrigation.
- AQUA-STIC NUTECH** may also reduce the breakdown of agricultural remedies by means of environmental factors such as direct sunlight, heat, volatilization, abrasive activity and wind.

DIRECTIONS FOR USE: Use only as indicated.

NOTES:

- It is advisable to do a miscibility test prior to mixing **AQUA-STIC NUTECH** with other agricultural chemicals.
- MIXING:** Mix **AQUA-STIC NUTECH** with a small amount of water prior to adding it to the spray tank. Add this mixture to the spray tank while it is being filled with water. It should be the last component added to the spray mixture. Once added, be sure to vigorously agitate the spray mixture.
- APPLICATION:** Always use properly calibrated spray equipment in good working order. Ensure good coverage on all plant surfaces. **AQUA-STIC NUTECH** will not cause problematic foaming, freeze or clog nozzles during application. Avoid spray drift onto non-target areas.
- AFTER SPRAYING:** A sticky residue may remain in the spray tank after it is rinsed. Use a suitable cleaning agent to thoroughly clean the spray tank, all lines and nozzles. It can also be used to remove any spray that has landed on any unintended surfaces. Refer to the label of the cleaning agent for recommended directions for use.
- Spray at least one hour before anticipated rainfall or planned irrigation. Product may be lost from plant surfaces during periods of rainfall (depending on the intensity and duration of the rainfall).

APPLICATION	DOSAGE	COMMENTS
STICKER: To cause prolonged adherence of the pesticide by forming a sticky elastic film that ensure the effective retention of the product on the plant surfaces.	150 – 300 ml / ha	Use the higher rate for crops with thicker and/or waxy cuticles.
