Liquid Boron

FERTILISER GROUP 2

A boron solution for use as both a foliar feed and fertigation.

Boron (B) 100 g/kg (130 g/ℓ)

SG (@20 °C) = 1.30 ± 0.02

Product approved for the use in organic farming according to EEC889 by CERES GmbH.

May be used in organic farming only if deficiency of the micronutrient being applied is documented.

Registered, Manufactured and Distributed by:
Rolfes Agri (Pty) Ltd.
(Reg. No. 1998/013411/07)

UN NO.: NOT REGULATED
SEE CONTAINER FOR BATCH DETAILS
COUNTRY OF ORIGIN: REPUBLIC OF SOUTH AFRICA
VERSION ROLFES AGRI: 06/2019
**FOLIAR FEED:**
Use enough water to achieve a full cover spray. Do not exceed a concentration of 0,75 % (750 ml / 100 l). For sensitive crops do not exceed a working concentration of 0,15 % (150 ml / 100 l).

**SOIL APPLICATIONS:**
Apply as a uniform spray to the soil surface. If practical leach boron into the root zone.

**DIRECTIONS FOR USE: USE ONLY AS DIRECTED**

The rate of application is dependent of the soil fertility and reaction required. The lower rates should be used for maintenance while the higher rates will correct nutritional deficiencies. Consult with your chemical distributor, consultant or manufacturer should crop specific programs or any other information be required around the use of fertilisers.
