

Easygro Calmag + TE

Reg. No. K7304 Act No. 36 of 1947

FERTILISER GROUP 1

Water soluble powder fertiliser 14:0:1 (15) with calcium, magnesium, potassium, nitrogen and trace elements for foliar feeding and fertigation.

| | | |
|------------|------|------------|
| Calcium | (Ca) | 129 g/kg |
| Magnesium | (Mg) | 26 g/kg |
| Potassium | (K) | 14 g/kg |
| Nitrogen | (N) | 140 g/kg |
| Boron | (B) | 2000 mg/kg |
| Molybdenum | (Mo) | 50 mg/kg |

LIFT HERE

- **EASYGRO CALMAG + TE** is recommended for use during plant growth periods that require relatively high calcium and magnesium levels and during periods of stress when the uptake and movement of calcium in the plant is reduced.
- **EASYGRO CALMAG + TE** is specifically formulated to correct cation imbalances that may occur in plants.
- **EASYGRO CALMAG + TE** is a completely water-soluble fertiliser and chlorine free.
- **EASYGRO CALMAG + TE** is readily taken up by the plant and is formulated as both a foliar feed and for fertigation.
- For optimum results **EASYGRO CALMAG + TE** should be used in a program in combination with the other **EASYGRO** range of fertilisers.
- **EASYGRO CALMAG + TE** is compatible with most agrochemicals. **It is however advisable to do a miscibility test prior to mixing with other chemicals. Do not apply with products containing high levels of phosphorus.**

DIRECTIONS FOR USE: USE ONLY AS DIRECTED

| APPLICATION | RATE PER HECTARE | RATE PER 100 ℓ WATER | REMARKS |
|-------------|------------------|-----------------------|--|
| Foliar feed | 1 – 5 kg | 1 – 2 kg | Vegetable and ornamental crops. Apply as a full cover spray directly onto fruit. Apply at 1 – 2 week intervals. |
| | 1 – 5 kg | 1 – 3 kg / 30 ℓ water | Aerial Application. Apply at 1 – 2 week intervals as required. |
| | 4 – 6 kg | 1 – 2 kg | Large trees and orchards. Apply at 1 – 2 week intervals. In case of deficiencies apply directly onto the fruit. |
| Fertigation | 5 – 10 kg | 0,25 – 2 kg | Use lower concentrations for seedlings and increase the rate as the plants increase in size. |

The rate of application is dependent on the soil fertility and reaction required. The lower rates should be used for maintenance while the higher rates will correct nutritional deficiencies. **EASYGRO CALMAG + TE** should preferably be applied in the early morning or late afternoon. **Do not apply to plants that are undergoing a period of moisture stress.** Consult with your chemical distributor, consultant or manufacturer should crop specific programs or any other information be required around the use of the **EASYGRO** range of fertilisers.
