

AGRI-PASTE

FERTILIZER GROUP 2
Reg No. B5853 ,B5852 ,B5851 ,B5854 ,B5850

Agri-Paste consists of a range of products that are highly concentrated fertilizers, dispersible in water, and safe to use on a variety of crops as foliar feed or fertigation.

What is Agri-Paste?:

Agri-Paste is 'n range of stable Super Suspension Concentrated (SSC) products that are an INDUSTRY FIRST and EXCLUSIVE to Rolfes Agri. **Agri-Paste** can be applied as a foliar feed for maintenance, or to correct specific nutrient deficiencies in various crops.

The Agri-Paste Range's composition:

Agri-Paste Ca	276g/kg Ca
Agri-Paste Mg	279g/kg Mg
Agri-Paste Zn	570g/kg Zn
Agri-Paste Mn	280g/kg Mn
Agri-Paste Cu	390g/kg Cu

Benefits of Agri-Paste Range of Products:

- Due to the highly concentrated formulation of the **Agri-Paste Range** of products, lower application rates are needed to apply the same amount of nutrients vs other SC products on the market.
- Lower application rates will reduce transportation costs, which will lower the total input cost of the crop. Lower input cost equals more revenue!
- The entire **Agri-Paste Range** of products comes in unique packaging and is much easier to discard after use vs conventional containers.
- The **Agri-Paste Range** of products provides an extended release of nutrients, which will lead to absorption over a longer period of time.
- Low chance of phototoxicity due to the safe formulation of the Agri-Paste Range of products.
- 3-Year shelf-life instead of the normal 2-year shelf-life of SC products.
- Positive environmental impact due to the highly concentrated properties of the **Agri-Paste Range** of products, as well as the specific packaging used. There is a substantial reduction in total plastic consumption compared to other similar products. Less plastic per active ingredient.

How to use the Agri-Paste products:

- Due to the concentrated formulation of the **Agri-Paste Range** of products, it must be emulsified before adding it to the spray tank.
For example: Add 1 kg **Agri-Paste** to 5 ℓ of water, stir/shake well until dissolved and only then add product to the spray tank.
- Ensure good agitation once added to the spray tank.
- Apply the **Agri-Paste Range** of products as a foliar feed early in the morning or late afternoon.
- The **Agri-Paste Range** of products are highly concentrated pastes with particle sizes smaller than 5 µm. It can therefore be used for fertigation, pivot, drip and micro application.
- For optimum results, all **Agri-Paste Range** of products should be used in a program and in combination with other balanced fertilizers and foliar feeds.

Where to use the Agri-Paste products:

- The entire **Agri-Paste Range** of products are registered as a foliar feed on a wide range of crops.
- **Agri-Paste** can be applied as a foliar feed, or through fertigation.

*See label for further instructions and informations.
