

# Muscle-Up Fizz 500 ST

A water-soluble effervescent tablet. A non-selective systemic glyphosate weed killer with little or no soil activity, for post-emergence control of annual and perennial weeds.

## Anti-foam agent

To ensure a clear solution and effective uptake.

## Wetter

To ensure better coverage and uptake.

## Ammonium Sulphate

Water conditioning. The dissolved salts in the water binds with the sulphate so that it does not bind to the glyphosate. The ammonium binds with the glyphosate to improve the uptake in the plant.

## Glyphosate

For effective broad spectrum weed control.

- Weed control in an effervescent tablet form.
- 100g and 300g Packaging available for ease of use in 5ℓ or 15ℓ Spray solutions (single tablet).
- An innovative solution for weed-free areas.
- A ready to use formulation = no wastage

### Benefits:

- No plastic.
- Lower transport cost per active vs. liquid.
- Easy and convenient to use.
- Effervescent tablet dissolves within minutes.

- **Muscle-Up Fizz 500 ST** doesn't require any product measurement, simply add the effervescent tablet in water.

- Whilst the **Muscle-Up Fizz 500 ST** dissolves there is foam visible as soon as it dissolved completely it becomes a clear solution.
