Store at room temperature • Keep out of direct sunlight
Keep container closed when not in use

PRECAUTIONS:

- Do **NOT** swallow **ECOBAIT**.
- If medical advice is needed, have container or label at hand.
- Keep out of reach of children.
- Read carefully and follow all instructions.

Although this remedy has been extensively tested under a large variety of conditions, the registration holder does not warrant that it will be efficacious under all conditions because the action and effect thereof may be affected by factors such as abnormal climatic and storage conditions; quality of dilution water, compatibility with other substances not indicated on the label and the occurrence of resistance of the pest against the remedy concerned, as well as by the method, time and accuracy of application. The registration holder furthermore does not accept responsibility for damage to crops, vegetation, the environment, or harm to man or animal or for lack of performance of the remedy concerned due to failure of the user to follow the label instructions or to the occurrence of conditions which could not have been foreseen in terms of the registration. Consult the supplier in the event of any uncertainty.

Application rates:

CROP/PEST	DOSAGE	REMARKS
Canola (snails and slugs)	10 kg / ha	<ul style="list-style-type: none"> • Scatter bait on the soil around or near the plants to be protected. • Broadcast application: Standard broadcast spreaders may be used.
Barley (Snails and slugs)	10 kg / ha	<ul style="list-style-type: none"> • Row application: Standard granular spreaders may be used. • ECOBAIT can also be applied by means of an aerial application.
Grapes (Snails and slugs)	10kg / ha	<ul style="list-style-type: none"> • Re-apply as the bait is consumed or at least every 2 weeks if slugs and snails continue to be a problem. • Do NOT place in piles. • Wet the ground before applying bait, if the ground is dry.

NOTES: Ensure that application equipment has been suitably calibrated.

DIRECTIONS FOR USE: Use only as indicated.**Aerial application:**

Ensure that the bait is evenly distributed over the treated area and that the loss of bait is restricted. The following requirements are essential to meet these criteria:

1. Application must be conducted by a registered Aerial Application Operator. The aircraft must be correctly calibrated according to the instructions of SANS 10118 (Aerial Application of Agricultural Pesticides).
2. Bait volume should be at a desired rate of 10 kg per ha.
3. 1.0 g bait granules per m² should be recovered at the target area.
4. A RPM / orifice setting of 2.9 = ± 1125 RPM should be set in order to achieve a delivery rate of 10 kg/ha. This aspect will ensure the minimum loss of product.
5. When wind speed exceeds 20 km/h, stop distribution.
6. Ensure that the Aerial Spray Operator knows exactly which fields to spray.
7. Assurance needs to be obtained from the Aerial Spray Operator that the above requirements will be met and that relevant data will be compiled and kept in a logbook for future reference.
