Shake well before use • Store at room temperature
Keep out of direct sunlight • Keep container closed when not in use

AMMO-UP is suitable to eliminate antagonism between herbicides with residual action and incompatibly with phenoxy herbicides.

WARNINGS

- Observe any warnings that apply to the product or products with which **AMMO-UP** is to be used.
- Observe caution when using **AMMO-UP** with any herbicide.
- **AMMO-UP** may improve the efficacy of selective herbicides to such an extent that the mixture may lose its selectivity and cause damage to the crop.
- Do not use **AMMO-UP** with herbicides that require an alkaline environment (pH > 7).
- It is not recommended to add additional buffers and/or acidifiers.
- Store in original container away from food and feeds.

Although this remedy has been extensively tested under a large variety of conditions the registration holder does not warrant that it will be efficacious under all conditions because the action and effect thereof may be affected by factors such as abnormal climatic and storage conditions, quality of dilution water, compatibility with other substances not indicated on the label and the occurrence of resistance of the weed against the herbicide used as well as by the method, time and accuracy of application. The registration holder furthermore does not accept responsibility for damage to crops, vegetation, the environment or harm to man or animals or for lack of performance of the remedy concerned due to failure of the user to follow the label instructions or to the occurrence of conditions, which could not have been foreseen in terms of registration. Consult the supplier in the event of any uncertainty.

PRECAUTIONS

- If medical advice is needed, have product container or label at hand.
- Read carefully and follow all instructions.
- Keep out of reach of children.
- Empty all contents from the container by placing it upside down over the spray tank and holding it there for at least 30 seconds. Puncture the rinsed container to render it useless and send to a recycler.

DIRECTIONS FOR USE: USE ONLY AS INDICATED.

Mix **AMMO-UP** with the spray tank water before adding the herbicide. Always add the herbicide last.

Additional adjuvants or surfactants may only be added to the tank mixture if indicated on the label of the herbicides, contact your crop advisor for specific recommendation. Ensure agitation of solution during mixing and application.

Water Quality			Application Rate
Good	pH 6 – 7	EC 0 – 500 mS	1% (1 liter per 100 liter water)
Average	pH 7 – 8	EC 500 – 1000 mS	1.5%(1,5 liter per 100 liter water)
Poor	pH > 8	EC > 1000 mS	2%(2 liter per 100 liter water)

EC is a measure of the total soluble salts in solution. If EC is not available or measurable use a rate of 2% or 2 liter per 100L water.
