Aqua-Wet

Reg. No. L6204 Act No. 36 of 1947

ADJUVANT • WETTER

A water soluble wetting agent for use with the majority of agricultural sprays to improve the wetting and sticking properties of sprays to plant foliage.

Active Ingredients:
Alcohol ethoxylate
Glycol ether
Fatty acids
Total active ingredients: 900 g/ℓ

IN CASE OF POISONING PLEASE PHONE 082 466 8946
UN NO.: NOT REGULATED
SEE CONTAINER FOR BATCH DETAILS
COUNTRY OF ORIGIN: REPUBLIC OF SOUTH AFRICA
VERSION ROLFES AGRI: 01/2019

Registered, Manufactured and Distributed by:
Rolfes Agri (Pty) Ltd.
(Reg. No. 1998/013411/07)
288 Mundt Street, Waltloo, 0184, Gauteng, RSA.
Tel: (012) 803-0145 • Fax: (012) 803-8418

SHAKE WELL • Shake well before use • Store at room temperature • Keep container closed when not in use

HARMFUL

LIFT HERE
Although this adjuvant has been extensively tested under a large variety of conditions the registration holder does not warrant that it will be efficacious under all conditions because the action and effect thereof may be affected by factors such as abnormal climatic and storage conditions, quality of dilution water, compatibility with other substances not indicated on the label as well as by the method, time and accuracy of application. The registration holder furthermore does not accept responsibility for damage to crops, vegetation, the environment or harm to man or animals or for lack of performance of the adjuvant concerned due to failure of the user to follow the label instructions or to the occurrence of conditions which could not have been foreseen in terms of registration. Consult the supplier in the event of any uncertainty.

PRECAUTIONS
- Wear suitable protective clothing and rubber gloves when handling the concentrate.
- Keep container tightly closed when not in use.
- Avoid prolonged contact with concentrate.
- In case of contact with skin or clothes wash with soap and water.
- In case of contact with eyes flush immediately with water for at least 15 minutes. If irritation persists get medical attention.
- Observe caution when using AQUA-WET with any new spray chemical as the improved wetting and sticking properties may change the selectivity of the herbicide as the improved wetting and sticking properties may increase the risk of damage to the crop.
- Rinse the container three times. For each rinse add clean water, to the volume of a quarter spray tank.
- Puncture the container. Keep caps separate and hand over to one of the CropLife South Africa approved collectors or recyclers.
- Prevent contamination of food, feedstuffs, drinking water and eating utensils.

SYMPTOMS OF HUMAN POISONING:
Causes irritation, redness and pain to the eyes. Irritating to the skin and respiratory tract. Ingestion may result in the development of nausea, vomiting and diarrhoea.

FIRST AID TREATMENT:
Inhalation:
Remove to fresh air. If not breathing give artificial respiration. If breathing is difficult, give oxygen. Do NOT give mouth-to-mouth resuscitation if victim ingested or inhaled the substance. Keep person at rest and warm. Treat symptomatically and supportively as and when required. Obtain medical advice if necessary.

Ingestion:
Have victim rinse mouth thoroughly with water. Give 1/2 to one glass of water to dilute the material if victim is alert and not convulsing. Do NOT induce vomiting. If spontaneous vomiting occurs, have victim lean forward with head down to avoid breathing in of vomits, rinse mouth and administer more water. Never give anything by mouth to an unconscious person. Qualified medical personnel should perform administration of oxygen. Seek medical advice immediately.

In case of poisoning call a doctor and make this label available to him/her.

Skin Contact:
Remove any contaminated clothing. Wash skin with soap or mild detergent and water for at least 15 minutes. Get medical attention if irritation develops or persists. Wash clothing before re-use. Do NOT rub the skin hard.

Eye Contact:
Immediately flush eyes with lukewarm water or saline solution for at least 15 minutes, lifting lower and upper eyelids occasionally to ensure rinsing of the entire surface of the eyes. Check for and remove contact lenses after the first 5 minutes. Get medical attention immediately.

NOTE TO PHYSICIAN:
Treat symptomatically.

DIRECTIONS FOR USE: Use only as directed.

MIXING INSTRUCTIONS:
AQUA-WET may be used with any spray or applied to any crop unless otherwise stated. Add the required quantity of AQUA-WET to the water and agitate thoroughly before adding other chemicals.

GENERAL NOTES:
- AQUA-WET is a concentrated wetting adjuvant.
- AQUA-WET improves the retention of the applied spray solution to plant surfaces.
- AQUA-WET is recommended for use with the majority of agricultural sprays and will not interfere with the suspensibility thereof.
- AQUA-WET reduces the surface tension of spray mixtures.
- AQUA-WET ensures the maximum distribution of spray mixtures over the plant foliage.
- AQUA-WET can be used with hard and soft waters.
